JurInnov Ltd. Announces the Launch of an Information Security Blog

“Security Spotlight” Blog Provides Valuable News, Tips and Guidance on Information Security

CLEVELAND, OHIO – March 10, 2011 – JurInnov Ltd. (www.jurinnov.com), a technology consulting company providing information security and electronic discovery services, today announced the launch of “Security Spotlight,” an information security blog. Authored by Eric Vanderburg, Manager of Information Systems and Security at JurInnov, the blog presents current and relevant information security content, including valuable news, tips, and guidance. The blog can be found at <http://www.security-spotlight.com> and the rss feed is available at <http://security-spotlight.jurinnov.com/code/blog.rss>.

Security Spotlight was launched to help organizations defend against information security threats. With new threats emerging every day, it is important for organizations to stay abreast of recent developments in this dynamic and rapidly evolving field. If not properly addressed, information security threats can turn into costly and embarrassing data breaches. According to the “2010 Annual Study: U.S. Cost of a Data Breach” by the Ponemon Institute, the average organizational cost of a data breach in 2010 was \$7.2 million, with an average cost per compromised record of \$214.

“Security Spotlight is a valuable resource for those concerned with protecting their data. It covers a broad range of information security topics including operations security, risk management, security governance, and business continuity,” stated Eric Vanderburg of JurInnov.

About JurInnov Ltd.

Established in the year 2000 by Timothy M. Opsitnick Esq., JurInnov Ltd. has become a trusted resource for companies whose technology and litigation needs are as varied and specialized as the companies themselves. JurInnov’s international consulting practice applies technology solutions to challenging demands of corporations, law firms and government agencies. Services include information security consulting, litigation document management, computer forensics, and electronic discovery. JurInnov is a certified partner of Microsoft® Corporation, developers of the Windows SharePoint™ Portal Server, and a Ringtail™ hosting partner of FTI® Technology.
